

Always one move ahead.

& WHAT'S
YOUR
RIDE?

Your **wheelsets** are in the best care with us.

More Informations: traintech.oebb.at

We are the number one partner for maintenance of wheelsets in Austria and past our borders.

- State of the art wheelset center of excellence in Europe, in Knittelfeld since 1997
- Innovative technologies and testing equipment to guarantee fast lead times, highest quality standards and safety
- Decades of experience of our experts
- Our technical customer support enables a professional process from delivery to pick up of your wheelsets

Our services include the general maintenance levels for freight waggon wheelsets following the VPI:

IS1 – Entry check, residual stress check, reprofiling of the running surface and wheelset measure, ultra sonic testing on the running surface, data proofing, layering of correct coating, quality control

IS1+IL – Entry check, residual stress check, reprofiling of the running surface and wheelset measure, ultra sonic testing on the running surface, bearings test, regreasing the bearings, data proofing, layering of correct coating, quality control

IS2 – Entry check, residual stress check, reprofiling of the running surface and wheelset measure, entire paint removal, bearings test, destructive free testing of axle and wheel discs according to VPI, data proofing, new coating of entire wheelset, quality control

IS3 – Entry check, axle maintenance through magnetic particle testing, installation of new wheel discs, quantifying measurements, bearings test, data proofing, layering of correct coating, quality control

We are looking forward to your inquiry!
